

learn@AP 2 Days Life Insurance Technical Programme for Leaders

learn@AP's 2 Days Life Insurance Technical Programme for Leaders is designed specifically for current and upcoming leaders of the life insurance industry. Our programme covers the principles and practices of technical life insurance matters, bypassing the nitty gritty and theoretical aspects of traditional actuarial training.

Participants can expect to gain a holistic and comprehensive understanding of the technical aspects underlying life insurance business. Our programme is suitable for participants transitioning towards a leadership role in a life insurance company.

Our programme covers the following topics:

- Key profit drivers of life insurance companies
- Principles and application of pricing and financial reporting
- Principles and practices of product pricing
- Principles and practices of setting reserves
- Key considerations in product design
- Capital management and supervisory expectations
- Surplus distribution and policyholders' expectations
